Skills: Dart, Flutter, BLoC, Provider, Firebase, REST API, PostgreSQL, Git, CI/CD, AWS, Clean Architecture, Figma, Unit Testing

Work Experience

Purple Drive Technologies   Jul 2024 – Present
Senior Software Engineer
- Developed fintech web app using Flutter and BLoC for scalable, responsive design.
- Implemented secure transactions, real-time data updates, interactive dashboards.
- Improved performance and maintainability with effective state management.
- Collaborated cross-functionally aligning development with business goals.

Novac Technology Solutions   Aug 2022 – Jul 2024
Software Engineer
- Delivered Flutter B2B and B2C apps with 50k+ users; integrated APIs, payments, notifications.
- Collaborated in Agile teams ensuring timely releases.

Oracare (Freelancer)   Feb 2022 – Jul 2022
Mobile App Developer
- Built patient appointment app with booking, reminders, dashboards.
- Designed UI/UX and integrated backend APIs.

Key Projects

Gold Auction Platform (MYSamil App)
- Led development of online auction platform using clean architecture and Bloc pattern.
- Integrated socket-based bidding system for real-time auction updates and notifications.
- Implemented responsive design optimized for multiple devices.

Delivery and Cash Collection App
- Developed delivery app with efficient order management and navigation features.
- Integrated dynamic routing to optimize delivery personnel transit times.
- Created intuitive UI for order tracking, status updates, and cash collection.

Sale Order (E-commerce App)
- Added product search, cart management, and secure checkout features.
- Used asynchronous futures for efficient data fetching and processing.

Kazito (Retail Management App)
- Implemented Text-to-Voice Search for accessibility and natural language queries.
- Integrated barcode scanning for efficient inventory management.
- Collaborated with stakeholders to prioritize and refine app features.
